24 1/2" wide  
40" deep

## Player's controls are:

- Steering wheel
- Gear shift
- Accelerator
- Brake

WEC Le Mans is the 24-hour world endurance championship. All other races pale in comparison. No other race challenges a driver, physically or emotionally.

as WEC Le Mans 24. The racer must push himself and his car far beyond limits required by any other race. He must use his sixth sense as he becomes one with a machine which is perilously insensitive to human frailties. WEC Le Mans is not a game—it is the ultimate driving experience.

The Big Spin not only jumps up and down, but turns back and forth and even spins up to 180 degrees. The player must accelerate, brake, and shift in order to excel in the Le Mans. It has the most realistic graphics and sounds imaginable. Players are challenged by the day and night driving of the actual 24-hour race. Counter steering is needed to avoid spin-outs. The talent of a world-class driver is required to negotiate the hills and curves. The game simulates the

course so exactly that it has been approved by Automobile Club De L'Ouest (A.C.O.).

The mini spin version has all the excitement of the bigger version without the size. It also turns back and forth, reacting to the action of the driver's steering. WEC Le Mans 24 is also offered in a unique upright cabinet, featuring all the great game play and graphics as the other versions. The upright features a vibrating steering wheel which reacts directly to the driver's acceleration, simulating actual road vibration. In addition, should your vehicle veer off the road, much greater shaking occurs giving the realistic feel of off-the-road bumps.
